TRANSPORTATION IMPROVEMENT PROGRAM

The TIP is a short-range program that identifies transportation projects to be implemented in the Wichita Area Metropolitan Planning Organization (WAMPO) region.

What Does it Include?

PRIORITY PROJECTS
The TIP includes a list of priority projects to implement over a four year period.

The listing includes diverse projects, including capital construction projects like bridge repairs and replacements, road preservation work, construction of new bicycle facilities as well as non-construction activities like purchasing replacement transit buses and technology projects.

The TIP can be found on WAMPO’s website. www.wampo.org/Work/Pages/TIP.aspx

Why it’s Important!

Illustrates how communities in our region are working together with State of Kansas and WAMPO to invest federal, state, and local tax dollars on the transportation system.

The projects implement the WAMPO long range metropolitan transportation plan, MOVE 2040, which defines the vision and goals for the region’s transportation system.

What’s the Process?

- Solicit projects from cities, counties, the State of Kansas, and Wichita Transit
- Screen the projects
- Share the project information for public review and comment
- Compile a listing of regional non-WAMPO funded projects
- Share all projects with the public for review and comment
- Submit to the WAMPO Policy Body (TPB) for consideration
- Forward the approved version of the WAMPO TIP for incorporation into the Kansas TIP

What About Changes?

The program is amended on a quarterly basis and updated every two years. Each time the TIP is changed, the public and stakeholders are provided an opportunity to comment on the proposed changes before it is submitted to the WAMPO TPB for consideration.

The WAMPO TIP Manager works closely with local governments to stay abreast of project status, changes, and to provide periodic updates. To learn more about the TIP contact wampo@wichita.gov or call 316-268-4315.
